Thousands of Seals, O-Rings, and U-Cups
World-Class Service since 1976!

Individual Vee Packing Components

* Add suffix to Size Number to specify component Part Number

- FN= Nylon Female Adapter
- FF= Fabric Female Adapter
- VF= Fabric Vee
- VH= Hytrel Vee
- VB= Homogeneous Nitrile Vee
- MN= Nylon Male Adapter
- MF= Fabric Male Adapter

The next few pages contain a listing of solid vee packing. Most of these sizes correspond to the stack height chart below. Glass filled nylon adapters (for extrusion resistance) and hytrel vees (for dry wiping action) are standard in most sizes under 10" O.D.. Also available, are plus and minus adapters for meeting your nonstandard stack height measurements. Contact the sales department for more information.

Virtually any size packing, up to 40", can be made from our extensive stock of vee ring spiral. The stack height chart does not apply for spiral packing sets or fabric adapters.

Standard material: Cotton reinforced nitrile rubber is compatible with most petroleum based fluids including gasoline, and can be used in constant temperatures to +250 degrees F.

Hytrel is engineered thermoplastic with a low friction coefficient and high abrasion resistance. It works well when alternated between fabric and rubber vees. Up to three hytrel vees may be used in a set or by themselves.

Cotton reinforced viton will work in constant temperatures to +300 degrees F, with good resistance to swell.

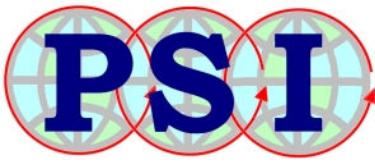

Glass filled nylon adapters are compatible with most fluids and will withstand constant temperatures up to 275 degrees F, making them suitable for use with viton and duck for semi-high temperature and fluid applications.

Vitex (Viton and nomex; a very high temperature fabric containing Kevlar and fiberglass) can be used at constant temperatures up to 400 degrees F. Contact our sales office with application for material recommendations.

Cross Section		Height Per Vee	2 Vee Rings	3 Vee Rings	4 Vee Rings	5 Vee Rings	6 Vee Rings
