TFE Wearband Tape

Wearband strip is supplied in 2 materials: 60% bronze filled teflon and phenolic. Phenolic strip is supplied by the foot in coils and the teflon strip is supplied by the inch in roll form.

Be aware that many competitors supply teflon strip with less or no bronze content and that nothing less should be used for heavy duty hydraulic applications.

Lightly filled teflons are fine for light duty pneumatic applications. Phenolic strip offers excellent compressive strength, but may be harder to form in some applications. 60% bronze filled teflon strip will form to any size easily and can be skive cut to almost any width and thickness. For full rolls or coils, call sales for pricing, availability and length.

Part Number	Width D		Wall C
WBTAPE-0375-062BTFE	3/8	X	1/16

Nylon Female Center Bearings

Bearings are made from glass filled nylon with excellent compressive strength. They are used for piston applications between sets of vee packing.

Part Number	Bearing Size			Packing Size		
	Inside Diameter A	Outside Diameter B	Height D	Inside Diameter		Outside Diameter
