A37 Type Metric Urethane Wipers

A37 style wipers are made from 90 durometer urethane and are commonly found in Japanese hydraulics. The outer lip keeps contaminants from entering the system from the outside of the wiper groove.

Part Number

NW Type Nylon Wipers

NW wipers are made from a moly-filled nylon material and are more properly referred to as scrapers. The tough material is great for removing slag and other harmful contaminants from the rod.

Part Number	Wiper Dimensions (In.)				Groove Dimensions (In.)
